Education

King Abdulaziz university	2020 – present
B.S. Computer Science	Jeddah, SA
4.91 GPA	

Certificates

IBM Data Science Professional Certificate
Gained proficiency in foundational data science skills like data wrangling, data cleaning, and visualization using industry-standard tools like Python, SQL, and Pandas.
Developed practical knowledge of machine learning algorithms, data analysis, and data visualization techniques.

The Odin Project Foundations
Built a strong foundation in web development through a comprehensive curriculum covering HTML, CSS, and JavaScript fundamentals.
Gained hands-on experience by completing practical projects, including building responsive landing pages and interactive applications, such as an Etch-A-Sketch drawing application.

CS50: Introduction to Computer Science
Mastered problem-solving through hands-on programming projects in C, Python, and SQL.

Projects

Etch-A-Sketch
Developed an interactive Etch A Sketch web application that implements user interaction to enable drawing lines and erasing the screen using HTML, CSS, and JavaScript.

Automobile Sales Statistics Dashboard
Developed a dashboard to analyze the historical trends in automobile sales during recession periods using Dash and Plotly.

Automated Web Navigation with Selenium
Developed a Python script utilizing Selenium to automate web navigation, it automates opening Chrome, navigating to a streaming site, selecting a random season and episode from a TV show and playing it in full screen.

House sales prediction
Built a house price prediction model using ridge & linear regression.
